

Total Interior Design means everything

Why pay so much attention to the architecture, wall coverings, fabrics and lighting when there's one small finishing touch that we see and touch every day?

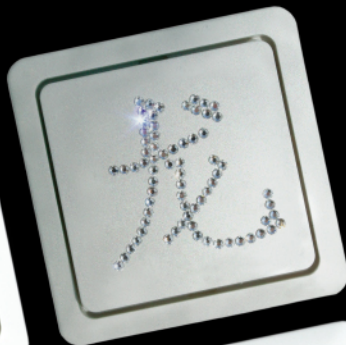

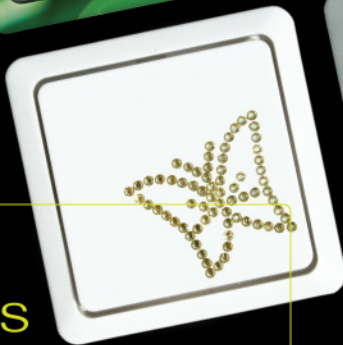

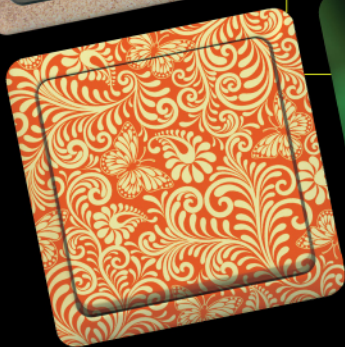

www.alypower.gr

Bespoke Printed Switches

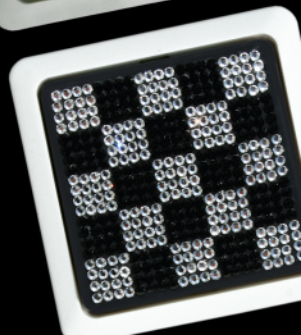

With our bespoke design printed light switches you can finish your interior design in keeping with the overall look, feel and style of your space.

- patented process ensures durability
- no minimum production quantity
- give us your own images & designs

Jewelled Touch of Class

You will know that jewels by Swarovski add more than a touch of class. That's why in co-operation with Swarovski we can complete your design project in a style and finish that is completely personal to you.

Our Products are Unique

The Dye Sublimation printing process:

- thermo-cured with specially developed inks
- infused into the plastic surface between 0.2 mm and 0.3 mm
- far superior to any contemporary surface coating
- ensures unbeatable wear resistance stability and durability
- three dimensional surface (wrapped around the edge of the switch)
- UV rating 5/6 (does not fade in sunlight)
- 10 year guarantee

Design Yours!

You can easily design your own light switch in a few minutes. Simply visit our web site at www.alypower.com and start designing your own custom made light switch.

Go Green save the planet...save money

Substantially reduce your carbon footprint and save money by entering our "switch off campaign". By printing your own image or slogan with a "switch off" message, you play your part in saving the environment and reducing your own electricity costs. This is particularly useful to high consumption facilities such as: Hotels, Office, Large public facilities. We wish to take this concept further by offering energy saving light switches to large refurbishment projects anywhere in the world.

BACTIglas™

the new technology of Antibacterial Coating

Available for all types of switches, giving extra safety against the spread of bacteria which is necessary, especially in hospitals.
